Continuation of Box I.2

Claims Nos.: 1,7 (PARTLY)

The subject matter of present claims 1 and 7 is defined by means of the functional feature: compounds being adenosine A2A receptor antagonists.

Because of the character of the functional features, it cannot be guaranteed that the search performed is complete.

It cannot be excluded that compounds fulfilling the requirements of the functional feature have not been identified as doing so in the prior art. If such compounds have not been identified in the application either, they have not been covered by the search.

The search has been carried out, based on the functional features per se as well as the compounds of formula (I)) given in the application.
